

Healthier 'On the Go' Meals and Snacks

Selecting healthier food and drink choices while working on the go' can often be a challenge. **Small changes**, such as packing your own stash of healthy snacks can make a **big difference** to your health.

BILLION

Australians drink 1 billion coffees a year, of which 480 million are cappuccinos

Healthier 'on the go' meals and snacks

For mobile or 'on the go' workers, where their workplace is 'on the road', keeping healthy can present additional challenges, such as:

- difficulty accessing fresh, healthy food and cool water
- inflated costs of food at roadhouses, lunch bars of cafes
- · reduced opportunites to regularly stop and eat
- the ability to store food safely.

To assist 'on the go' workers to make healthier food and drink choices, consider:

- providing a drink bottle for workers to ensure they can access water
- offering solutions for safe food storage such as eskies or chiller bags with ice blocks.

Snack ideas

There are also a range of food and snack ideas widely available, many of which don't require refrigeration. However, some would benefit from being stored in a chiller bag or esky if available.

Like all healthy eating recommendations, the key message is to increase fruit and vegetables and to reduce the amount of saturated fat, added sugar and salt consumed as per the Australian Dietary Guidelines (www.eatforhealth.gov.au).

Many of the snacks recommended come in individual packs, which are:

- quick to grab in a hurry;
- easy to store and less prone to spoilage or getting squashed; and
- assist with portion control.

Some of the snacks are also highlighted with an asterisk (*). This means that the snack is a good source of protein. For those workers undertaking long shifts, protein will help one keep fuller for longer while there is some evidence that suggests a high protein meal helps to maintain alertness.

In addition, some snacks are highlighted with a thermometer icon . This indicates snacks that require or would benefit from refrigeration.

Apple

Baked beans* (130g can or 200g snap pot)

Banana

Diet soft drink

Dip to go (4 tbsp tzatiki dip with 4 celery sticks in a jar)

Fruit varieties of cereal or muesli bars (1 bar)

Grapes (1 small bunch)

Handful of plain wheat breakfast cereal (½ cup)

Hard boiled egg*

Liquid breakfast drink* (250mL)

Mandarin

Not feeling like a full meal?
A 200g tub of reduced fat yoghurt
topped with untoasted muesli is
quick and nutritious*

Parmesan pita chips ½ pita pocket sprayed lightly with spray oil, topped with 1 tbsp parmesan and baked until crispy

Pear

2 plain pikelets (bought or home made) spread with peanut butter or diet jam

Plain, unsalted nuts (50g snack packs)*

Popcorn plain, sweet or savoury flavours (30g snack packs)

Pretzels 1 cup pretzels

2 rice cakes or corn thins - plain varieties with diet jam

Rice crackers or rice cracker mix (30 - 50g snack packs or 14 crackers)

Sandwich - wholemeal or multigrain bread with peanut butter or diet jam

Sushi is always a good choice, just avoid the coated and crumbed fillings (6 pieces for lunch or 2 for a snack)

Tetra packs of long life plain or flavoured milk* (<300mL)

Thermos of soup (300mL)

Tinned fruit or fruit tubs in natural juice (140g snack packs)

Tins of tuna - plain springwater, brine or flavoured in oil* (90g tins)

Tuna and beans* (185g snack pack)

The 'drive thru'

For those who are really pressed for time, a quick stop at the drive thru may be the only option. Many of the menu items on offer are high in saturated fat, added sugar and salt. There aren't many healthy options available but listed below are a few of the better choices:

- Fruit smoothies
- Fish burgers
- Salads
- Seared or grilled chicken wraps

A word on energy drinks

With pledges of 'vitality', 'invigoration' and 'giving you wings', energy drinks promise a lot!

Energy drinks are a form of soft drink that contains a number of stimulants, vitamins and supplements that are desired to increase stamina, improve physical performance and boost mental alertness and concentration. However, they also contain particularly high levels of caffeine, sugar and other additives. Very little is known about their affect on our health.

Recreational consumption of energy drinks has been associated with a number of symptoms including palpitations, tremors, gastrointestinal upset, agitation and restlessness.

Those with a history of heart disease or caffeine sensitivity should also avoid consuming energy drinks due to the high caffeine content.
